INJURED IN A RUNAWAY.

Albert Mortensen Thrown Under Horse's Feet And Severely Kicked.

Funeral of George Mole-Greenwells Garr Nuptials-October Baggage Business.

Albert Mortensen, deliveryman for the George L. Stone meat market, met with a very serious accident in a runaway yesterday, near the corner of Lincoln avenue and Twenty-second street when one of the front wheels came off, and the wagon tipped forward horse's heels. The animal bacame throwing him to the ground under the frightened and began kicking, Mr. Mortensen having only one arm with which to help himself, was unable to ge away from the horse's feet and received several kicks in the body, knocking him unconscious. The horse then dashed down the street, entirely demol-ishing the vehicle. Mr. Mortensen was picked up and carried to a house near and Dr. Rich was summoned, who found the young man's injuries to be very serious. He was sent home, but will be unable to resume his work for

FUNERAL OF GEORGE MOLE,

All that was mortal of the late Geo Mole, one of Ogden's prominent businessmen, was laid to rest in the family burial ground yesterday afternoon The in the Mountain View cemetery. funeral services were held at the family residence on Lincoln avenue, Rev. Goshen of the Congregational church officiating. A quartet furnished the music. Rev. Goshen preached a very impressive and consoling sermon, eulogizing the life of the deceased.

Many beautiful fioral offerings were laid on the bier and a large funeral cortege followed the remains to the cemetery. The order of Eagles accom-panied by Foster's military band, atended the funeral in a body.

A PROBLEM SOLVED.

Another Gordian Knot Cut.

A Discovery Invaluable to the Seience of Medicine.

An Invention That Will Be of Benefit to Thousands of People.

There is no doubt about the value of Vinol, this new form of cod liver oil, concerning which so much has been said lately. It is just another one of those great inventions that is bound to revolutionize a certain branch of science. This time the science is that of saving lives. Hence the greater good that will be derived from this discov-

Mr. Druehl of the Smith Drug Co of this city, who so fortunately suc-ceeded in associating himself with nade his name one that will never be forgotten in our city. His foresight and shrewdness enable him to take advantage of what has proved to be a most wonderful blessing to all who are in need of medicine for the cure of throat, lung and bronchial troubles, as well as wasting diseases of every des-

This Vinol is simply cod liver oil in new form, cod liver oil without any oil, paradoxical as the statement may sound. In other words, as Mr. Druhe explains it himself, Vinc. is the concentrated essence containing all the ac ive medicinal principles found in the liver of the live cod, without any of the objectionable features that were ormerly extracted at the same time such as fatty matter. The extract which is the basis of Vinol becomes tasteless, administered as it is in a delicate table wine. The efficient man-ner in which it acts is really wonderful. Physicians are now able to p scribe for patients Vinol where would have been impossible a short time ago to have recommended cod liver oil on account of the depleted condition of the patient's digestive or-

gans.
This has always been a drawback that has prevented more cures being effected where cod liver oil has been indicated. Patients are now able to take this medicine without the slight. inconvenience. In fact, to take ficial effect is most gratifying.
It is not often we believe it our duty

to expatiate so fully on a subject, but this is one that will admit of careful investigation by all, for it is indeed of the gravest importance that every one should become conversant with a remedy that is so often needed in our bleak climate

four and a half miles distant from Tooele Center. The station on the new line will be within two miles of Center, and a much lighter grade There can be no question but the train ervice will be much better than it has been, which Tooele people will greatly appreciate.

the accomplishment of much good alike to parent, teacher and pupil. At regular session of Stake Priest-hood meeting held in Tooele Saturday, Nov. 1, steps were taken towards the organizing of a Sunday school in Stockton. VALUE OF ORCHARD GRASS.

During the past summer it was emonstrated on a farm west of Dener that orchard grass, dactylis glom rates, is one of the best drouth-resist ng perennials and has other desirable qualities as well. It has faults, such as growing in bunches with rather coars straw and not of the highest palatabil ty Its early and vigorous growth in spring, the rapidity of growth after ing inowed or grazed and its remarkble ability to withstand drouth ar strong points in its favor. During the past summer it kept pace with alfalfa n growth, when timothy and bluestem were apparently dead. If the grass is cut fairly early the hay is of creditable quality. This grass seeds abundantly and never falls to grow. It is a better grass to sow with others or with alfalfa than sown alone, but is an infernal nuisance when it becomes firmly established in a blue-grass lawn although in the course of several years the latwill crowd it out. Orchard grass omes to Laturity rather early in th eason and if not cut before the seed leads form the seed is likely to be blown all over the country.

A MILLION DOLLAR ORCHARD.

An Iowa syndicate to be known as he Frisco Orchard company has pur chased 7,000 acres of orchard land in Laciede county, Missouri, in the heart of the Ozark region. The proposition is a million dollar stock company which ntends to plant the largest apple or chard in the world. Contracts have al-ready been awarded for clearing and planting and the entire tract will be set o fruit within four years. During the est two years peaches will be planted o provide earlier crops, and with the expectation of putting the property on paying or at least self-supporting basis the first two years, small fruits will be grown between the rows and ough of the orchard devoted to annuck, etc. M. J. Wragg will superinend the planting operations. The pres dent of the syndicate is William Bayard Craig, formerly pastor of the church in Denver, but now of the Drake university of Des Moines, Iowa.

WIRE FENCES AND LIGHTNING

Forty-eight head of cattle that were leaning against a barb wire fence in a pasture near Plainfield, Illinois, were all electrocuted recently by a powerful cur-cent of electricity that coursed along the wires. Lightning struck a tree to which the wires of the fence were atached, nearly a mile distant and the current was conveyed along the o where the cattle were standing. There it left the wires and the cattle ceived the entire force of the thunderolt, which had journeyed all the way from the tree. Every one of the ani-mals went down in an instant and fell n a row alongside the fence just as i dereed by a single bullet fired while they stood in line. Wires are apt ecome charged at any time when the air is thus burdened with electricity, so be dangerous to life and property as to be dangerous to life and property and should be grounded as a means of avoiding danger.

SOIL FOR TRANSPLANTED TREES

It is rarely the case that in the planting of a number of trees some are not lost. Nurserymen invariably answer of customer's inquiry on this point by ad mitting that a few may be expected to die. It depends largely on what kind of tree it is. Some sorts may be plant-ed with an assurance that no more than one in a hundred would die, being of a variety easily transplanted. There is a good deal comes from the planting, whether of success or failure. Much has been written of how to plant trees. and it is not my intention now to do more than speak of the soil immediatesurrounding the root. I am sur at very many trees die from a failure of the soil to embrace the closely, writes Joseph Meehan in Practical Farmer. Wet soil cannot be got close to them if lumpy. It has to be rather dry and fine, to be in the best condition for getting. It around the roots. A plan coming into use, and let me say a splendid one, is to fill in imnediately about the roos with pure sand, just sufficient to perfectly cove all the roots. This will creep into every crevice, pressing close part of the roots; and as all gardeners know, is unsurpassed for drawing out new roots. It would astonish one who had never tried it, to make trial and mark the result. And hardly any of the pounding and ramming at the soil is necessary when sand is used, unless i be that required to have the tree stand firmly in place. Those who know of the use of sand in this way are delighted with the result, as hardly a tree fails which has been so treated. Nurserymen use heaps of sand for temporary heeling in of trees, as they keep perfectly in this way.

BELGIAN SCHOOLS FOR FARMERS

No other European country is devoting as much attention to training young men as farmers and the young women as farmers' wives as Belgium is at present. Schools of agriculture are being built in every part of the coun-try and the Belgian government is offering uncommon inducements to en-courage young people to enter them. The province of Brabant, for example, offers to boys every year ten scholar ships of \$50 each and Antwerp, Hain ault, Luxembourg and Liege extend sums varying from \$20 to \$600. The course of study in nearly all the schools is two years, at Carlsbourg it is three. The government has also founded a number of analytical laboratories in connection with the schools at which analysis of milk, wool, earth and different food products, such as corn and cheese can be made, at a small fee. The success of these laboratories has been enormous. In the year when they were started only 94 analyses were made, while in 1901 the record was 28,805. For the training of the girls, dairy schools are being started everywhere. They can be entered gratis by any girl over 15 who is strong enough for dairy work, who can show a certificate proving that she has had an ordinary elementary education, and who will prom ise in writing to attend the classes regularly. Two thousand girls have been trained in practical dairy keeping since

the schools were started.

Besides doing all in her power to train future farmers, Belgium is offer. ing all sorts of advantages to her pres-ent tillers of the soil. They can gain free advice based on the experience of men of science on almost any subject by applying to the ministry of agriby applying to the ministry of agri-culture. They can learn just what sort of manure to use in a certain dis-trict or what sort of potatoes or grain to sow on any special land. They re-ceive this information in the most de-finite form, as, for instance, that from statistics drawn up by the government, "the result of 16 trials during the years 1897, 1898, 1899, in the region of La Campine 26,114 kilogrammes per hecoakley, Cassia Co., Ida., Nov.
